

C O N T E N T S

<u>Introduction</u>	1
---------------------	---

FIRST PART : THE INDEX K

1. EXPERIMENTAL BASIS OF THE MEASUREMENT: THE AMPLITUDE a	3
2. DEFINITION OF THE K INDEX	5
3. MEASURING TECHNIQUE	
1. Description of the gauge	5
2. Use of the gauge	
3. Border cases	10
4. May the gauge be tilted ?	11
5. Incomplete records	12
6. Conclusion	13
4. THE MEANING OF THE K INDEX	
1. Which aspect of magnetic variations is measured by K-index ?	14
2. Use of only the horizontal components H and D	15
3. Determination of K-index by the greater amplitude a of the two components H and D	16
4. Length of the interval Δt	21
5. Quasi-logarithmic scale	30
6. Meaning of the measurements	36

SECOND PART : IDENTIFICATION OF THE NON-K-VARIATIONS

1. DEFINITION OF K-VARIATIONS AND NON-K-VARIATIONS	
1. Genesis of the classical definition	38
2. Definition of the "regular daily variation" S_R	40
3. Classification of non-K-variations	43
1. The S_R variation	43
2. The L variation	44
3. The post-perturbation effect	44
4. The s. f. e. ?	45
4. Conclusion	45
2. ELEMENTS OF AN OBJECTIVE BASIS FOR THE IDENTIFICATION OF THE NON-K-VARIATIONS	46

3.	RULES FOR A DISCRIMINATION BETWEEN THE S_R VARIATION AND K-VARIATIONS	48
1.	Properties of SD-events	50
2.	Description of smooth K-variations	54
1.	Auroral latitudes	54
2.	Middle latitudes	54
3.	Low latitudes	55
3.	Practical rules for a discrimination between S_R and K-variations	56
4.	Remark on drawings of S_R	65
4.	GLOBAL DESCRIPTION OF THE S_R VARIATION	
1.	The C_M system	66
1.	Models R, T and F	67
2.	Invasion and distortion	69
3.	Latitude zone where the shapes described in 4. 1. 1 and 4. 1. 2 appear	73
4.	Secondary effects of the C_M system ("magnetic meridian" effect, variation in intensity, in latitude, in shape of the C_M system)	74
5.	Particular effects of the C_M system at latitudes higher than that of the focus	77
6.	Particular effects of the C_M system at latitudes lower than that of the focus	79
2.	The C_P system	81
1.	General description of the C_P system	81
2.	Effects of the C_P system at subauroral and auroral latitudes	85
3.	Effects of the C_P system in the interior of the auroral zones	89
3.	Criteria for the identification of S_R	90
4.	Conclusion	91
5.	PARTICULAR FEATURES OF THE S_R VARIATION IN VARIOUS REGIONS OF THE EARTH	92
1.	The interior of the auroral zone	92
2.	The auroral zone	94
3.	The exterior of the auroral zone	94
1.	Northern longitudes $0^\circ - 30^\circ E$	95
2.	Northern longitudes $240^\circ - 300^\circ E$	96
3.	Northern longitudes $180^\circ - 210^\circ E$	97
4.	Northern longitudes $140^\circ E$	97
5.	Northern longitudes $60^\circ E$	98
6.	Australian longitudes	99
7.	Southern longitudes $70^\circ E$	99
8.	Southern African longitudes	100
9.	Southern American longitudes	100
4.	The equatorial electrojet	101
1.	The morning minimum	101
2.	The L variation	102

6.	POST-PERTURBATION EFFECT AND ZERO-LEVEL	
1.	The post-perturbation effect	103
2.	The zero-level	105
1.	Determination of the zero-level	105
2.	Interpretation of the nocturnal constant level in H	106
	CONCLUSION: ELIMINATION OF NON-K-VARIATIONS AND PRECISION OF THE MEASUREMENTS	108
	Analytical Table	110
